EDUCATION

City University of Hong Kong, *MA Communication & New Media* 2023 – 2024

- Focus: Media Data Analytics
- Relevant areas: social media data analysis, media data visualisation, communication research methods, social network analysis

Lanzhou University, *BA Advertising* 2015 – 2019

SELECTED PROJECTS

Audience Sentiment Analysis Project

- Processed 20,000+ public comments from international media platforms for audience response analysis and insight reporting.
- Cleaned and organised unstructured text data, generating word frequency charts, word clouds and sentiment polarity distributions.
- Identified key discussion themes and audience response patterns, then summarised findings into a clear visual report.

Social Media Content Performance Analysis — Xiaohongshu / RED

- Collected and structured RED/Xiaohongshu post data using Python, Selenium, Pandas and Requests for content and engagement analysis.
- Cleaned text data by removing duplicates, emojis, garbled text and irrelevant fields, then organised posts by engagement indicators.
- Analysed high-performing content and headline patterns to support a simple AI-assisted headline generation prototype.

PROFESSIONAL EXPERIENCE

Fenbi Education, *Verbal Reasoning Instructor* 06/2021 – 06/2023

- Reviewed learner performance data and feedback to identify common weak areas and adjust course delivery accordingly.
- Designed structured online lessons and translated complex reasoning concepts into clear learning materials for large learner groups.

Taiping Internet 4A Advertising Agency, *Planning Intern* 01/2019 – 07/2019

- Conducted market research and competitor analysis for FMCG and beauty brands, organising findings into structured presentation materials for planning work.
